How risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

Starlight Capital has rated the volatility of this Fund as **medium**.

This rating considers how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the "What are the risks of investing in this Fund?" section of the Fund's simplified prospectus.

Best and worst 3-month returns

This table shows the best and worst returns for the A Series units of the Fund in a 3-month period since inception. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

Who is this fund for?

Investors who:

- are seeking a regular source of income,
- are seeking a fund investing in the real estate sector,
- are not concerned with short-term price fluctuations,
- are willing to accept a medium degree of risk, and
- are planning to hold your investment for the long term.

A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the Fund in a registered plan such as a Registered Retirement Savings Plan, or a Tax-Free Savings Account. Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell the A Series units of the Fund. The fees and expenses - including any commissions - can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. Sales charges

You can only buy Series A units of the Fund under the initial sales charge option.

Sales charge option	What you pay		How it works

It goes to your representative's firm as a commission. Your representative's firm may allow you to pay this commission directly to them. Discuss this option with your representative.

You don't pay these expenses directly. They affect you because they reduce the series' returns.

More about the trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own Series A units of the Fund. It is for the services and advice that your representative and their firm provide to you. Starlight Capital pays the trailing commission to your representative's firm. It is paid from the Fund's management fee and is based on the value of your investment.

Sales charge option	Amount of trailing commission	
	In percent (%)	In dollars (\$)
Initial sales charge (ISC)	0.00% to 1.00% of the value of your investment each year.	\$0 to \$10 each year on every \$1,000 invested.
