#### How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

#### **Risk rating**

Starlight Capital has rated the volatility of this fund as low to medium.

This rating considers how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the Fund in a registered plan such as a Registered Retirement Savings Plan, or a Tax-Free Savings Account. Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested. Switches of shares between classes of shares of a mutual fund corporation, including the Corporate Funds, will result in a taxable disposition of those shares at their market value. Such disposition may result in a capital gain or capital loss for you.
